

DOUBLE CABIN MOVANO

Snoeks Automotive B.V., the Dutch based European specialist in van-conversions, developed a double cabin for the Movano.

The double cabin matches six-seater capacity with a large load space. Obviously the concept complies with the highest European level of safety standards; the construction is N1/M1 approved by 20G pull tests on frame and seatbelt connecting points. The adjustable headrests are fully M1 tested. The three seats are equipped with approved three-point seatbelts.

Next to safety comfort is one of the starting-points for the development process. The location of the seat has been worked out in a way that both legroom and load area are maximized. The seats are finished with original upholstery. Snoeks always uses high quality and durable basic materials.

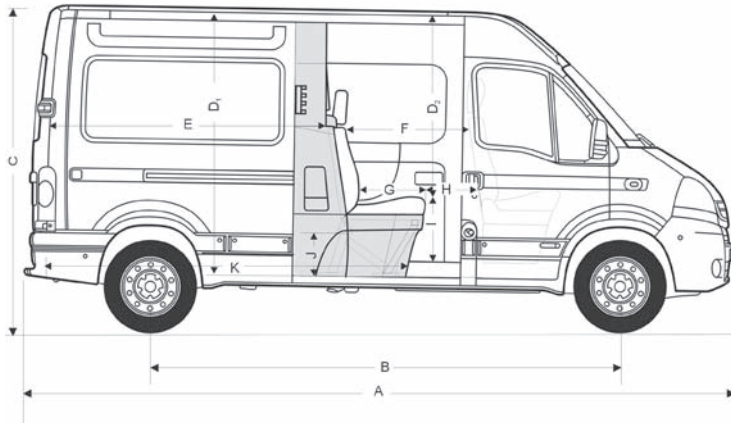

Also the design of the double cabin has played an important role. By means of a well-designed ABS-plastic bulkhead the load space and the passenger compartment are completely divided. Nevertheless the room under the rear seats is accessible from behind to allow practical storage of longer items like ladders. The full floor length is still available!

An excellent standard of quality is guaranteed due to the fact that the entire process, including design and production of the parts, is in Snoeks' own hands.

The double cabin is easily adaptable to a large range of work and leisure purposes allowing you to transport both load and work-crew or family in a comfortable and safe way.
