

# DOUBLE CABIN VAUXHALL VIVARO

Snoeks Automotive B.V., the double cabin specialist for Europe, has developed a double cabin especially for Vauxhall Vivaro.

By adding a second seat row with an integrated partition wall it is possible to convert your closed panel van into a double cabin at all times. The perfect solution for the combined transport of people and material. Safe, comfortable and efficient.

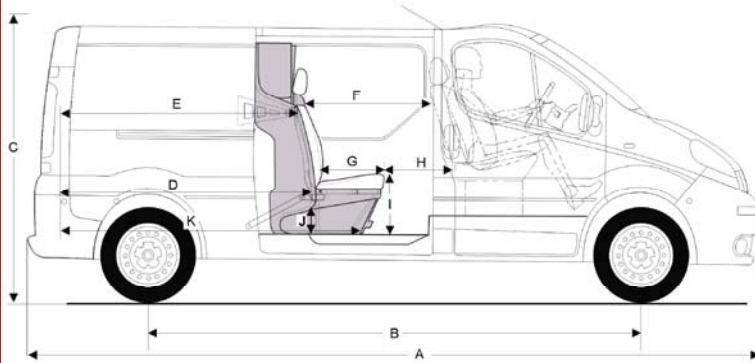

Obviously the double cabin applies to the highest European safety standards. The construction is N1/M1 approved by 20G pull tests on frame and seatbelt connection points and the in height adjustable and tilting headrests are fully M1 tested. Besides this the seats are equipped with approved three-point seatbelts and the separation wall is designed to meet the DIN 75410-3 standard for load shifting protection.

Next to safety, comfort is one of the starting points of the development process. The location of the bench has been worked out in a way that both leg room and load area are maximized. The deep seat, the high seatback and the inclination of the seatback, are resulting in an unequalled comfort.

Also design plays an important role when developing a double cabin. Materials and shapes are as close to OE-design as possible, including floor, side wall covers and headlining. The fine designed partition wall separates load and passenger compartment completely. Additional load space under the rear passenger bench extends the load area to allow practical storage of longer items like ladders.
